

## Junior Project Analyst Internship

### About Mitsio Motu

Mitsio Motu is a company specializing in the use of data and new technologies to enable universal, quality access to basic services (energy, water, connectivity, hygiene, culture, public transport and logistics, health, education, culture...) - and more generally, a company specializing in the design and deployment of innovative, positive-impact solutions.

Mitsio Motu provides public and private ecosystems with relevant information and tools to enable better interaction and decision-making: accessing information and funding, collaborating with its network, planning deployments, monitoring and optimizing operations. We operate a unique model, which involves simultaneously carrying out ambitious field operations, processing complex data, developing tailor-made digital solutions and maintaining rich interactions with decision-makers from a variety of worlds.

Mitsio Motu operates from offices in Togo, France and Nigeria. Since its creation in 2018, Mitsio Motu has carried out various assignments across Sub-Saharan Africa (France, Senegal, Nigeria, Togo, Benin, Ghana, Côte d'Ivoire, Burkina faso Sierra Leone, Uganda, DRC, Tanzania...) in a significant number of sectors.

Our references include

- a variety of assignments involving the deployment, evaluation and optimization of basic infrastructure networks (water, energy, telecommunications, mobility...), as well as agricultural value chains (pastoralism, livestock, market gardening...), networks and ecosystems (start-ups...)
- a nationwide inventory of infrastructures (over 150 different asset types and more than a million infrastructures listed);
- a national geoportal;
- a national deployment plan for 50,000 solar street lamps;
- a national digital platform for start-ups;
- a digital incubator for West African creatives.

The company now aims to capitalize on its knowledge, develop a base of technological solutions, automate its procedures, strengthen its position in Nigeria, Togo and France, and expand into new markets.

### What you will do

As a Project Analyst, you will participate in the implementation of various projects, both in the field and remotely.

You will manage and support project teams who:

- Propose methodologies and solutions adapted to the problems encountered
- Prepare and carry out information gathering activities
- Process and analyze data
- Develop IT solutions

You will participate in the production of deliverables, the planning and monitoring of project progress, the standardization and implementation of new internal processes, and the testing of new technologies and tools.

You will participate in the execution of administrative and security tasks required during operations, and may participate in international missions.

### **Soft and hard skills we value**

You're a student or graduate, preferably from a top business school, engineering school, political science school, engineering school, or any high-level university course in the same field. Curious and committed, you're keen to take part in concrete projects within a company with a mission.

You are passionate about development issues, access to basic services in rural, peri-urban and urban areas, and the use of new technologies and innovation. You would like to participate in several projects with a positive social and environmental impact.

Attentive to detail and inquisitive, you are able to analyze both quantitatively and qualitatively, and have a broad general knowledge.

You are resilient, enduring and able to navigate anywhere, including in environments that are sometimes operationally difficult. You are results-oriented and able to find appropriate solutions in emergency situations. Your analytical/critical mindset enables you to easily manage several tasks independently.

A sociable person, you quickly integrate into a pre-established team and are at ease with all types of external contacts (administration, private sector, citizens, etc.).

Disciplined and a good listener, you know how to take advice, receive instructions and carry them out. Autonomous, you are inclined to propose and launch initiatives to optimize teamwork or innovate.

Rigorous towards yourself, you are aware of the impact of your work on your environment and are attentive to the needs of your team.

A first successful experience is desirable in consulting, investment, project management in the basic services, development or new technologies sectors, or in a project in West Africa/Sub-Saharan Africa.

### **Mandatory:**

- French (fluent) - English (C1)
- Mastery of team management tools
- Proficiency in Google, Microsoft and GPT tools
- Code skills a plus

### **Type of contract:**

Full-time internship/CDD - 6 months - Competitive salary according to profile

For international profiles, international transport, accommodation, complementary health insurance and field travel expenses will be covered.

### **Where:**

Based in Lomé, Togo.  
Potential trips across Sub-Saharan Africa.

**When:**

Start: September 2024  
End: February 2025

**Recruitment procedure:**

1) Initial HR telephone contact 2) Case study 3) Interview with management team

Send your CV and cover letter, as well as any relevant documents or links (Github, previous projects...) with the following email title 24-09-JUNIOR-PROJECT to :[candidature@mitsiomotu.com](mailto:candidature@mitsiomotu.com).
